Chicago, IL | (872) 310-9765 | [abhilash01289@gmail.com](mailto:abhilash01289@gmail.com) | [abhilash-portfolio](#) | [linkedin.com/in/abhilashpannala](https://linkedin.com/in/abhilashpannala)

## SUMMARY

Software Engineer with 2+ years of experience developing scalable backend and full-stack systems for NCR's enterprise loyalty platform. Skilled in designing RESTful APIs, building microservices with Java and Node.js, and optimizing performance in high-traffic, cloud-based environments. Seeking a Software Engineer role to design robust architectures, enhance reliability, and deliver production-grade solutions.

## TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, C
- **Frameworks & Libraries:** Spring Boot, React, React Native, Node.js, Django, FastAPI, Bootstrap
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Oracle
- **API Technologies:** RESTful API Development, GraphQL, OAuth2, JSON, Microservices Architecture
- **Cloud & DevOps:** Google Cloud Platform (GKE, Cloud Run, Cloud Dataflow, Cloud Build), AWS, Docker, Jenkins CI/CD
- **System Design:** Scalable Microservices, Distributed Systems, API Design, Multithreading
- **Testing & Quality:** JUnit, Selenium, Cucumber, Gatling, BlazeMeter, SonarQube
- **Tools & Platforms:** Git, CI/CD Pipelines, Apache Beam, Firebase, Supabase, Render

## WORK EXPERIENCE

### Software Engineer I | *NCR Voyix* | Jan 2022 – Dec 2023

- Designed and developed backend microservices for a multitenant enterprise loyalty platform supporting real-time offers, discounts, coupons, and loyalty point processing at POS systems.
- Built and maintained RESTful APIs using Java, Spring Boot, and Node.js, serving thousands of requests per second in high-traffic retail environments.
- Improved system throughput and scalability by identifying performance bottlenecks and optimizing database queries, caching, and service communication.
- Deployed and managed cloud-native services on GCP using GKE, Cloud Run, and Cloud Dataflow.
- Automated CI/CD pipelines with Cloud Build and Jenkins, enabling seamless and reliable staged deployments.
- Increased code quality and reliability by refactoring backend services and improving SonarQube coverage from 85% to 92% with 100+ unit and integration tests.
- Conducted load and stress testing using Gatling and BlazeMeter, reducing API response times by 20%.
- Collaborated with cross-functional teams to deliver 40+ production features on schedule, contributing to system documentation and backend architecture decisions.

## EDUCATION

**Master of Information Technology & Management** | Illinois Institute of Technology, Chicago, IL | Expected Dec 2025

**Relevant Coursework:** Operating Systems Security, Service-Oriented Architectures, Data Networks & Internet, Advanced Database Management, Project Management

Bachelors, Information Technology & Management | VCE, Hyderabad, India | *Jun 2019 - Jul 2022* |

## PROJECTS

### Bookshelf – AI-Powered Book Discovery & Reading Assistant

**Live Demo:** [bookshelf-lq5o.onrender.com](#)

- Developed a secure full-stack book discovery app using FastAPI, Supabase, Google Auth and Google Books API, enabling users to search, save, and categorize books based on genres.
- Integrated Chatbase AI assistant for book summaries, recommendations and implemented cloud-based logging & analytics for tracking user activity and performance.

### CampExplorer – Full-Stack Campground Review & Mapping Platform

**Live Demo:** [campexplorer-luxp.onrender.com](#)

- Developed a dynamic campground listing and review platform using Node.js, Express, MongoDB, and EJS, featuring user authentication, CRUD operations, and photo uploads via Cloudinary.
- Implemented geolocation and interactive maps using MapTiler API, optimized error handling and deployment on Render, and ensured stability through clean architecture and robust error handling.

## CERTIFICATIONS

- The Web Developer Bootcamp - Udemy
- Programming, Data Structure and Algorithms Using Python - Udemy
- Introduction to Data Science in Python - Coursera
